

# Pressure and Positive-Pressure Liquid Leakage Tester

## (ISO 80369-20 Annex B and Annex C)

### Detail Information:

Place Of Origin	China	Brand Name	Kingpo
Certification	ISO 17025 Calibration Certificate	Model Number	ISO 80369-20
Standard	ISO80369-20 Annex B and Annex C		

### Product Description:

Our state-of-the-art Pressure and Positive-Pressure Liquid Leakage Tester is the ultimate solution for medical device manufacturers requiring precise liquid leakage testing according to ISO80369-20 Annex B and Annex C standards. This high-performance leakage tester features an advanced control system that ensures accurate, repeatable results for all your pressure testing and positive-pressure testing needs.

#### Key Features:

- Fully compliant with ISO80369-20 Annex B and Annex C requirements for liquid leakage testing
- Advanced digital control system for precise pressure regulation
- Dual testing capability for both pressure testing and positive-pressure testing
- High-accuracy sensors for reliable leakage detection
- User-friendly interface for easy operation of your leakage tester
- Robust construction for long-term durability in medical device testing

#### FAQ

- What standards does this pressure and positive-pressure liquid leakage tester comply with?  
A: Our leakage tester fully complies with ISO80369-20 Annex B and Annex C standards for liquid leakage testing in medical devices.
- Why is ISO80369-20 compliance important for liquid leakage testing?

A: ISO80369-20 compliance ensures your medical devices meet international safety standards for leakage prevention, particularly crucial for Annex B and Annex C applications involving pressure and liquid containment.
